674	Ethics in the Workplace	Cooley	0.60		0.60

Note: Every topic contained within 97.259 (c) is covered as part of the total 9 hours of education received in the Initial Phase One Curriculum. As stated in the question and answer from the DADS website below; all of the topics are included but do not exclusively make up the entire 8 hours. Administrators receive more useful information than is required by the minimum standard of the regulation through TAHC's educational offering.

Ques: 3.15 The language contained in 97.259(c) states that the education must "include" the topics listed. Does that mean that a person could take an eight-hour course that includes those topics and others? That would mean that the course would not necessarily consist of eight hours exclusively on those topics, however, would "include" information on each of those topics.

Answer: Yes. The eight hours of training may incorporate other subjects as allowed in the rule language. All training under this subsection must be in the administration of an agency and relate to that subject.

The information contained on this crosswalk has been reviewed and approved by TAHC's Director of Clinical Practice and Regulatory Affairs.

Rachel Hammon

Director of Clinical Practice and Regulatory Affairs
